HOW TO MEASURE

For best results, have someone else take measurements. Measure body in swimsuit or undergarments. Tape must be snug but not tight. If measurements fall between two sizes, order the larger size.

Chest

Measure under your arms, around the fullest part of your chest.

Waist

Measure around your waist at the narrowest place.

Hips

Stand with legs together, measure around the widest part of your hips, ensuring the tape is level.

Arm Length

Let your arms hang down at your sides in a slightly bent position. Measure from the center of the back of your neck, along the length of your arm, to the wrist.

Inseam

Without shoes, from crotch to the floor.

PFD Size Guide

Size recommendation:

Your PFD should fit snug around your body while providing comfort.

Your chest width is the key driver to define your PFD size. Measure the circumference of your chest at its widest point. Use our size chart to determine which size is closest to your measurement. If you fall in between two sizes we recommend you choose the smaller one. For safety purposes, a properly sized PFD should fit like a glove, stay in place but allow you to move freely.

How to fit:

When trying on a PFD, loosen all straps, put it on and zip or buckle it up. Afterwards adjust all straps. PFDs have adjustable features to tighten it further around your chest and belly if needed.
